EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Choongseop Lee on March 28, 2008.

The application has been amended as follows: In claim 1, at line 7, "pyroxlin" is replaced with --pyroxylin--; at line 21, "pyroxlin" is replaced with --pyroxylin--; at line 25, "pyroxlin" is replaced with --pyroxylin--; and at line 30, "pyroxlin" is replaced with --pyroxylin--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claim 1 is allowed.

The closest art available does not anticipate or render obvious claim 1. Bell (US 1,982,280) teaches a nacreous coating composition that can be applied to "metal, wood or other surfaces" which uses many of the solvents claimed in applicant's claim 1. However, Bell does not fairly teach or suggest the use of a thermoplastic resin bead as the core material, nor does it teach that the process of creating an imitation pearl is carried out in multiple steps using different coating media. Higgins (US 1,607,622) teaches a method of creating an imitation mother-of-pearl whereby a thermoplastic bead is first treated with a mixture of pyroxylin, acetone and benzene and then it is coated with fish scale pigments and pyroxylin. However, Higgins does not fairly teach or suggest the use of many of applicant's claimed solvents. Furthermore, neither Bell nor Higgins provides any reasonable motivation to combine the two references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
